### About the Ordre des comptables agréés du Québec

With a membership of close to 17,500 CAs, and 1,900 candidates, the Ordre des comptables agréés du Québec carries out its primary mission to protect the public by enforcing the most demanding admission criteria and the highest professional and ethical standards.

### Benefits of implementing Microsoft Dynamics GP

- Improved access to information
- Easier and faster data queries
- Versatile output options for reporting

### Partner

Strophe is proud to contribute to the success of the Ordre des comptables agréés du Québec.

## *“What do I like the most about Strophe? The team’s professionalism.”*

Sonya Guilbault, CA, controller

### The Ordre chooses Microsoft Dynamics GP

Right from the start, the Ordre des comptables agréés du Québec appreciated the exceptional usability of Microsoft Dynamics™ GP. The ease with which financial data could be extracted made it possible to automate the data integrity controls when transferring revenue data between the Ordre’s operational systems and Microsoft Dynamics GP. What’s more, for the Ordre it’s a major advantage that the two systems use Microsoft SQL Server technology. It makes it easier to run queries, but also enables the Ordre to fully automate its reporting.

The connection to Microsoft also tipped the scales since Microsoft relies on a large community of partners that continually offer new add-ons and a broad range of companion software. Choosing Microsoft Dynamics GP means being well prepared for the future.

### The Ordre chooses to work with Strophe

Strophe is an award-winning Microsoft partner with nearly 20 years of experience serving hundreds of users across Canada and the United States. Strophe is also the only Microsoft Gold partner to have a Microsoft Certified Dynamics training centre.

Strophe has definitely earned its reputation. Sonya Guilbault, CA, controller at the Ordre, particularly appreciated the professionalism of the entire team. According to Ms. Guilbault, the project manager performed an excellent needs analysis and customized the software accordingly. As a result, the transition between the old and the new system was very smooth and didn’t disrupt the users’ daily routine.

The project manager also trained the users, garnering praise from Ms. Guilbault: “The project manager was both knowledgeable and pleasant. She was able to gain a thorough understanding of our operations and then adapted the training to the needs of the different groups.”

### Benefits

Thanks to the implementation of Microsoft Dynamics GP 10.0, the Ordre has been able to replace a number of manual processes such as payroll. But the main difference is that the Ordre can now automate all data integrity controls between the Ordre’s operational system and Dynamics GP since data extraction can be done more easily. As a result of this successful implementation, the Ordre can now start the next phase of the project: implementing Analytical Accounting.
