“After implementing Microsoft Dynamics GP, we saw a 15% increase in productivity.”

Laura Scott, Director of Finance, Shannex Inc

Business needs:

Shannex was experiencing difficulties with the ageing and unsupported software it was using. Reconciling month-end accounts had become particularly problematic. As one of the two largest organizations under Atlantic Corporation, Shannex wanted to standardize its accounting and finance functions to be compatible with other operations of Atlantic Corporation. The new financial software also needed to integrate seamlessly with existing operational software plus be scalable to accommodate future growth.

Solution:

Shannex implemented Microsoft Dynamics GP because it was the perfect match for the organization's business needs.

“We felt secure knowing Microsoft had an exhaustive list of partners that we knew could help us with our needs. We felt supported,” says Laura Scott, Shannex's Director of Finance.

Benefits:

Microsoft Dynamics GP enabled Shannex to automate both its transactional processing and inventory control as well as deliver timely financial reporting. The solution fully supports future growth and is scalable. It also supports multiple databases, charts of accounts, and businesses. What is more, the software's tight integration with Microsoft Office and other Microsoft products not only makes it user-friendly, but also makes it easy to train new users. After just 2 months, Shannex saw productivity grow by 15%.

About Strophe:

Shannex benefited from a strong business relationship with Strophe. *“The project manager took the time to listen to our business problems and challenges,”* says Laura Scott. *“He also knew Microsoft Dynamics GP inside and out and was able to employ it to meet our business needs. Even now, 18 months later, the after-sale support we receive from the technical support team is excellent.”*

Strophe Atlantic is proud to have contributed to the success of Shannex Inc.
